## "He Won't Die"

Of consumption "is a remark often made of a fleshy man. The remark expresses the popular recognition of the fact that the sign of consumption is emaciation, loss of flesh. On the other hand, a gain in flesh is a sure sign that wasting diseases are being cured.

Emaciated people with obstinate coughs, bleeding lungs, night-sweats and weakness, have been perfectly cured by the use of Dr. Pierce's Golden Medical Discovery. The several steps of the cure were recorded in ounces and pounds of increasing weight. When there is gain in flesh the wasting disease is being surely cured.

Mr. Will H. Whitmore, of Artois, Rockingham Co., Va., writes: "Our son contracted a deep cold about the first of July, 1899, and had a terrible cough. We called a doctor and he pronounced it irritation of the bronchial tubes, with asthmatic trouble, and he informed me that my son was liable to die at any time. He told me that if we could keep the bronchial tubes open, he might cure him, but after treating him several weeks and my son growing worse all the time, I concluded to try Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' I had seen several almost miraculous cures brought about by the use of these medicines, and of course I had wonderful faith in them. He used three bottles of 'Golden Medical Discovery' at home and one oval of the 'Pellets,' and was then well enough to go to West Virginia, taking a supply with him. I am just in receipt of a letter from him from which I quote: 'I am well and hardy and getting very fleshy.'"

The Common Sense Medical Adviser, 1008 large pages in sent free on receipt of stamps to pay expense of mailing only. Send 31 one-cent stamps for the cloth-bound volume or only 21 stamps for the book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

## Senator McCreary Given An Ovation.

If there was ever any doubt about the personal popularity of the Hon. James B. McCreary in Washington it was dispelled by the ovation given the new Kentucky Senator when he took the oath of office in the Senate chamber. Escorted by the Hon. J. C. S. Blackburn, now the senior Kentucky Senator, he walked up to the vice president's desk, where the oath of office was administered, while there was round after round of applause from the galleries, which contained many Kentuckians and friends and admirers of the Senator residing in Washington. With the exception of the reception tendered Senator Arthur P. Gorman, of Maryland, who now leads the democratic forces in the Senate, Mr. McCreary received more applause than any other new Senator. Senator McCreary has been allotted by the sergeant-at-arms, a very desirable seat, immediately behind that occupied by Senator Gorman and between Senator Clay, of Georgia, and Clark, of Montana.

Senator McCreary's desk was covered with handsome floral decorations. There was a huge bunch of American Beauty roses from "Unassuming Fiscal Court and People of Madison county, Kentucky," where the Senator lives. Seventeen Kentuckians, residents of Washington, presented the Senator with a magnificent wreath seven feet high, interlaced with American beauty roses, wrapped with a red ribbon, upon which was printed: "Kentucky, United We Stand, Divided We Fall." After the signatures of the donors were written: "To Senator James B. McCreary, a Real Friend, a Real Man, a Real Democrat"—Washington Dispatch.

The motto of that floral tribute "Senator James B. McCreary, a Real Friend, a Real Man, a Real Democrat," leaves nothing to be said. It sizes up the new Kentucky Senator to a T.—Louisville Times.

Col. Roger D. Williams has received instructions to select 200 men from the Second Regiment, Kentucky State Guard, to accompany Governor Beckham to St. Louis, and he will select them according to the merit system.

He contracted for drilling No. 4 and five others and work will begin this week and be pushed night and day until completed. The gusher struck by the River-ton Oil Co. last week is the best producer in Kentucky. Mr. Owens was there when the strike was made and says that no excitement has yet been produced in the oil fields to equal this and that fully 1,000 barrels of oil was lost before getting it fully under control. This well is in sight of the Beaver Creek wells and the oil on about the same level and in the same sand. It is now conceded by all experts in the territory that Beaver Creek is the most desirable field yet developed in Kentucky, first, because there is a smaller per cent. of dry holes, second, the high grade of oil obtained in the Beaver Creek sand, third, Beaver Creek wells continue to flow and in 10 years will be better producers than they are to day.
